Welcome to the SwiftRead PDF Reader

1. Open your PDF document by using the "Open File" button in the top right.

   The "Open File" button looks like this:

2. Click the **orange** SwiftRead button in the top left, or press the open SwiftRead hotkey (Alt + V by default) to start SwiftReading the PDF's text.
   The **orange** SwiftRead button looks like this:

3. If SwiftRead seems to be "merging together" or "splitting apart" words from the PDF, adjust the "word spacing" setting in the top toolbar to help SwiftRead recognize whole words better.

   The "word spacing" setting looks like this:

4. Adjust the **gray** rectangular "masks" at the top and bottom of each page to tell SwiftRead what text to ignore in the headers and footers.

5. If your PDF has multiple pages, click the "left" and "right" arrow icons in the SwiftRead window to turn the PDF page backwards and forwards and start SwiftReading the next page.

Click the left and right arrow icons to turn the PDF page from within the SwiftRead window:

If you have any questions, reach out to help@swiftread.com.

Happy SwiftReading!
